Introducing Ávalos Sustainability Wellness Resort:

Where Dreams of Tomorrow Meet Today!

The developing company has been working in South Tenerife for over 4 decades, contributing to the development of Costa Adeje, including urbanizing, developing hotels, apart-hotels, shopping centers, residential areas, urban beaches, and other activities in the Canary Islands. The ones behind this development are the Ucelay family, a lineage of regional entrepreneurs. They created, among other areas, Playa de Fañabé in Tenerife.

Currently, Mr. Roberto Ucelay Jorge is leading Ávalos Resorts with developments such as Ávalos Villas.

Ávalos Sustainable Luxury

Sustainability

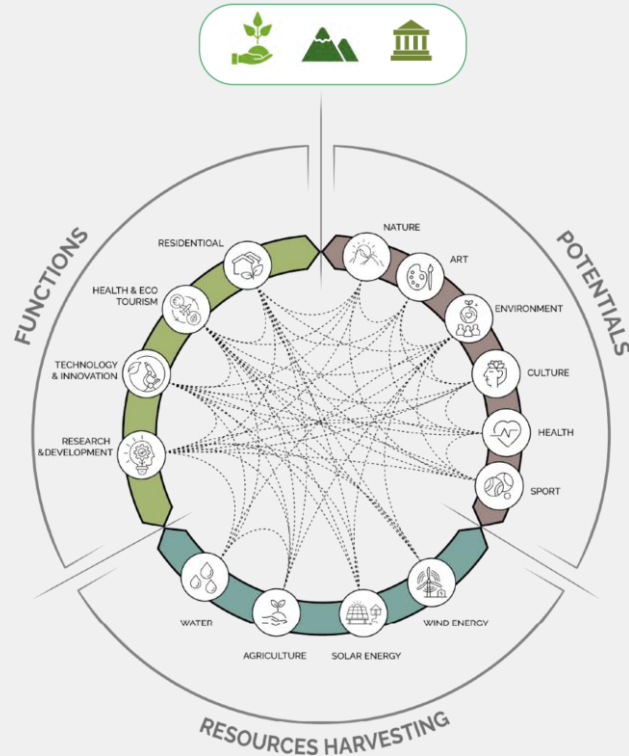

The modern hospitality industry is embracing sustainability as a cornerstone of its operations, recognizing that environmental stewardship and luxury are not mutually exclusive but rather complementary. This shift is driven by the growing awareness and preference of consumers for eco friendly practices and responsible tourism. ÁVALOS is redefining luxury through sustainable initiatives, integrating green practices in every aspect of their operations.

Key to this transformation is a focus on four main pillars: service, style, unique experiences, and value. Service in sustainable hotels goes beyond traditional hospitality; it involves educating and engaging both staff and guests in environmental initiatives. This approach transforms hotel staff into ambassadors of sustainability, promoting practices like using eco friendly cleaning supplies and offering locally sourced, organic food options.

Ecosystem

In terms of style, sustainable luxury hotels are incorporating eco friendly materials, energy efficient lighting, and water saving technologies into their design. This approach ensures that Ávalos is not only aesthetically pleasing but also environmentally responsible. The use of sustainable architecture and interior design showcases a commitment to the planet without sacrificing the comfort and luxury that guests expect.

Unique experiences offered by Ávalos is designed to create a deeper connection between guests and the environment. Activities such as curated eco tours, rooftop gardens, and workshops on local traditions allow guests to immerse themselves in the local culture and environment, enriching their overall experience.
